

loban™ 2

Antimicrobial Incise Drape

How can 3M™ loban™ 2 Antimicrobial Incise Drape help reduce hospital costs?

The following results are calculated by the 3M Budget Impact Calculator, based on health economic modeling and information provided by scientific studies.^{1,2}

In a calculated scenario with 100 cardiac patients, the reduction of risk of bacterial wound contamination with loban incise drape vs a non-antimicrobial drape when used in conjunction with good clinical practice (antibiotics, infection prevention protocols, and standard surgical technique), suggests the potential to be associated with:

5 fewer SSIs

(Surgical Site Infections)

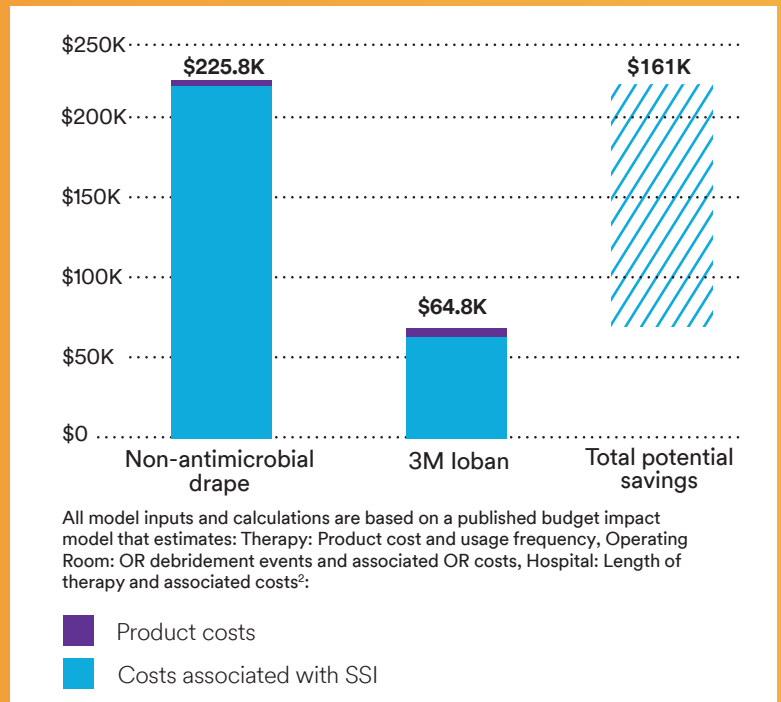

reduction of incidence of SSI

\$161,061

total cost saved

71.3%

total cost savings

Let us help you calculate your potential customized savings

This is an illustration and not a guarantee of actual individual costs, savings or outcomes. The results calculated by the 3M Budget Impact Calculator are based on health economic modeling and on information provided by scientific studies. It gives suggestions about budgetary relationships for the purpose of optimization. The calculations are conducted with reasonable care, using the instruments/parameters specified in the references. 3M shall not be liable for the results of the calculations and these results shall be seen as an indication only of the potential cost, savings and outcomes based on the information given and is in no way binding. Other factors, which might also have an influence on the results, may have not been taken into account.
