

Comparable effluent quality in terms of:

- High product recovery
- Turbidity reduction
- DNA removal
- Sterile filter protection

Enabling:

- De-risking of clarification process development, scale-up, and tech transfer
- Seamless integration and facility utilization
- Faster speed to market

One clarification platform: A variety of benefits

3M™ Harvest RC Chromatographic Clarifier platform

Now you can rely on one robust solution, the 3M™ Harvest RC Chromatographic Clarifier platform, for your clarification needs.

This next-generation clarification platform includes 3M™ Harvest RC Chromatographic Clarifier, for direct clarification and 3M™ Harvest RC Centrate Chromatographic Clarifier, for centrate clarification. These advanced products provide a scalable clarification platform solution that can compress clarification process trains while providing consistent and comparable fluid quality to streamline process development and impact speed to market.
